Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. The drawing is objected to because it should contain word labels that make it easy to understand what each of the elements in the drawing are. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: on at least pages 1 and 2 reference is made to "claim 1". Claim 1 has been canceled, and in any event the specification should not refer to the claims in this manner.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 5-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 is rejected because it is not clear whether it is claiming an apparatus or a method. The claim states that it is "an optimized bus connection for acceptance of bus transactions" which would appear to be an apparatus. However the language of the limitations such as for example "following the first store, there is provided..." and "following the first

functional section, there is provided..." appear to be a kind of method step. Perhaps this lack of clarity is a result of translating the claims from a foreign language.

Claim 5 is also rejected because it contains two periods, therefore it is unclear what applicant intends to be part of the claim. It is assumed that the first period is a typographical error.

Claim 5 is also rejected based on lack of positive antecedent basis of "the individual function lines" on line 23.

Claims 6-12 are rejected because they depend on claim 5.

Claims 7 and 8 are rejected because it is not clear what is meant by "for bus transactions starting from the bus connection up to the execution unit of the third functional section".

Claims 9-12 are rejected because it is not clear what is meant by "for the first class of transaction, starting from a point of arrival in the second functional section up to the execution unit of the third functional section".

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show systems that can process out of order transactions, but none of the references appear to show the details claims with respect to the classifying, typifying, and grouping of the transactions.
